- Brake Calipers
- Brake Master Cylinders
- CV Axle Shafts
- PCMs
- Distributors
- EGI Control Boxes
- Power Steering Pumps
- Steering Gears

Power Steering Pumps

Starters

CV Axle Shafts

Remanufactured – NOT Rebuilt

- The Mazda remanufacturing process starts with genuine Mazda original equipment components - not aftermarket or knock off parts. → Complete disassembly, cleaning and inspection of the genuine original equipment core.
- Mazda remanufactured parts comply with approved Mazda quality standards and processes.
- Mazda remanufactured parts use original equipment parts specifications to ensure the right fit, the first time. → Aftermarket competitors typically commonize and over-consolidate across multiple vehicle lines making repairs more difficult, time consuming, and less reliable.
- Genuine Mazda Remanufactured Parts qualify for use during the vehicle warranty period. Please refer to Mazda Parts and Accessories Warranty for details.
